ABOUT ME

I'm currently finishing my last semester at Whitworth University, one of the top students in my graphic design program and have a passion for hexcodes, grids and typography! While I've been in school, I have developed strong skills in the design of logos, layout design, package design, illustrations and web design (including HTML, CSS, JavaScript). I am confident in myself as a consistent and functional designer. I would love to gain more extensive hands-on experience in the field and to have the opportunity to work for a company that matches my enthusiasm for modern design and innovation!
